

Primary Care Liaison Nursing Team

- We have 2 nurses in our team at the moment and are looking for a new nurse to join the team
- Sam is still the nurse that covers Rutland
- I am sorry I cannot be with you today

Health Checks

- Rutland did really well this year making sure that lots of people had a health check
- There are 4 GP practices with 131 people registered
- 74% of those people had a health check

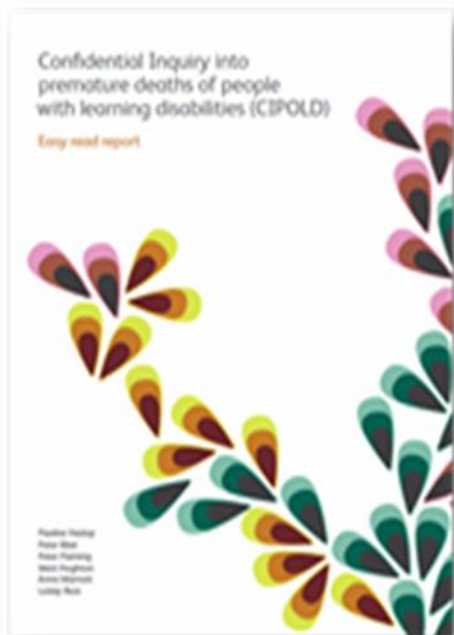

The things we are working on this year

- We are going to offer lots of training to Drs and nurses who work in Rutland and across all of Leicester City and the County this year
- We want to tell them more about the health checks, we also want to tell them about a new template they should use to do a good health check

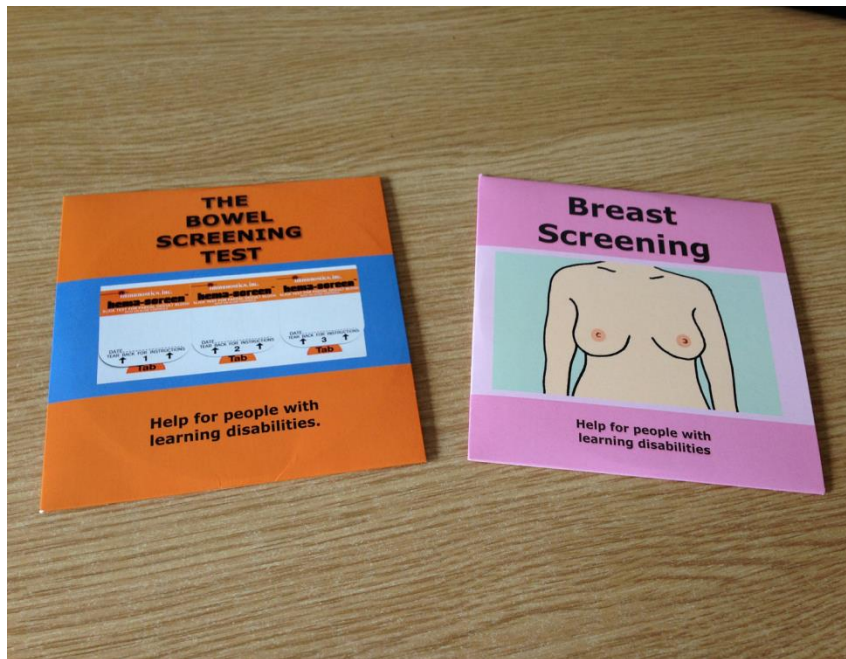

- We want to give them some information about how to spot Dementia in people with a learning disability and or Down Syndrome. We need to help them to understand that they need to do this differently for people with learning disabilities

- We want to tell them all about the LeDeR review so that they know that someone will want to talk to them if they were involved in a persons care before they died

Resources

- We want to make sure that everyone knows about the things we have made to help people to make decisions about cancer screening.
- We have made leaflets on bowel screening and bowel scope

- We have made leaflets and a DVD on having breast screening
- If you have been invited for any of these things and don't know what to do please give me a ring so I can help you

Good News

- Sam won a competition which means that Wistow Maze (near Market Harborough) is going to be designed to celebrate 70 years of the NHS this year. Sam will talk about her role as a nurse on the local radio in June

- We have also been invited to speak at an international (big) conference on 'Learning Disability and Cancer' in France in October as they would like to know all about our leaflets and DVD's

- Please ring me or email me any time if you need some help about your health or health services
